Vibe-Shipping Games

Peter Danenberg

Let’s start with a vibe.

Let’s start with a vibe.

Prompt for Veo 3: "Cinematic trailer for a game where K-Pop idols hunt demonic spirits in a rain-slicked, neon-drenched Seoul."

Nano-Banana creates the character sheet.

Nano-Banana creates the character sheet.

Prompt for Nano-Banana: "Generate a character sheet based on the attached image of 'Jin'. Provide four full-body orthographic views: front, back, left side, and right side. The background should be solid white, with no shadows or extra elements. Ensure the character's design, clothing, and proportions are consistent across all views."

You have 6-12 months to build this.

You have 6-12 months to build this.

The opportunity: Build the middleware that orchestrates AI for game creation.
Why now? Unity, Roblox, &c. are just starting. The race is on!
The window: 6-12 months before they ship end-to-end.
Your angle: Build the OS for AI-native games!
